www.BNind.com

Puck is a popular workhorse alternative to slatwall.

PUCK

Puck combines all the versatility expected of a panel-based system with a simpler, more modern look. With a robust collection of shelving, hangrail, graphic, and display accessories, Puck satisfies the design needs of all merchandise categories.

Left: the primary component of the system is the aluminum Puck. It is applied to the wall with a Puck Set Screw and Aluminum Spacer. The combination of these three elements tighten, level, and plumb the numerous accessories they accommodate.

Puck Basic and White Matte Laminate walls are a soothing "medicinal" backdrop in this dispensary.

Puck accessories come in two profiles: Puck Basic (above), and Puck Round (below). Both are shown here in a 12" Faceout, in brushed chrome.

Puck Pegouts are solid milled aluminum standoffs that "clamp" acrylic or other graphic substrates. Shown here are the Large (1 1/4" dia.) Pegouts with Pucks and Set Screws in 2", 4", and 6" lengths. For more on Pegouts see page 10.

Puck Pegouts

Pegouts lift a sign-holder or glass off the surface of a panel and secure it with Pucks. They can also be used for hanging mannequins.

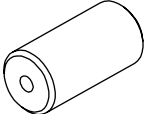

Note: All pegouts are satin anodized aluminum unless otherwise noted. Pegouts are tapped for 1/4 - 20 screw on both ends. You must order a Puck and two Puck Set Screws (one to attach the pegout to the Puck Panel, the other to attach the Puck to the Pegout to hold the graphic). See page 24 for Pucks and Puck Set Screws.
